

SECURE SD-WAN

flexWAN

#### HOW CAN TELEFÓNICA TECH HELP?

Our flexWAN converged network and security service, run by our experts at Telefónica Tech, protects your business from the threats of the future

Organisations today need to evolve to meet the threats of the future. As more businesses move to the cloud, the **business network becomes highly distributed, heterogeneous** and therefore **more vulnerable**. As a result, cyber threats are increasing rapidly and managing multiple security solutions is complex and costly.

**Telefónica Tech offers a fully converged network and security service**, from equipment to business processes, provisioning and operation, guaranteed by specialists in our operations teams.

**We have evolved SD WAN technology with advanced security functionalities through our FlexWAN solution**, putting at your disposal the technologies of the manufacturers that have been leaders in the WAN and security market for the last decade.

#### WHO IS THIS SERVICE FOR?

**Large and medium-sized national and international organisations** (average offices size between 10 and 200 users) that require all the **functionalities of secure inter-site communications and perimeter security**.

Connectivity, segmentation and optimisation of applications.

**Large and medium-sized organisations requiring advanced SDWAN functionality**, visibility, threat detection, data control and remediation.

## OUR VALUE PROPOSITION

### Our service

Telefónica Tech offers a comprehensive flexWAN network and security solution with market-leading technologies to centralise management and obtain visibility and control over the most complex network and security scenarios.

We support companies from the equipment to the commercial, provisioning and operational processes. This includes integration with the network, installation and provision of the device, operation, support and proactive evolution of the service based on market analysis and customer needs.

### What does it allow you to do?

This service will allow you to::

- › Adopt **market-leading WAN** and **security technology, advanced functionality** and a **complete portfolio**.
- › Enhance your own ability to **protect your business** and employees from **persistent cyberthreats**.
- › Have a network and security provision **advised by specialists** who design a customised solution, operate the service and help you develop it.

### Benefits

#### Simple and modular business model

We offer a customised monthly payment model with no upfront investment in HW, licences and platforms. Includes activation of all service elements and security features through our team of experts.

#### Real-time management portal

We facilitate the early detection and resolution of incidents through real-time monitoring of the service. The client has customised reports and graphs to read the status of their network and security services.

#### Transparent service delivery

We design solutions customised to the customer's requirements. A specialised technician will be responsible for implementing the service and the platform will be managed by Telefónica in the cloud to ensure data privacy.

#### Specialist customer care and management

We have optimised customer support teams available 24/7x365 for early identification and resolution of incidents, as well as agility in the management of configuration changes.

## Telefónica Tech's differential value

We provide expert advice to design a coherent, customised and scalable network and security solution.

We offer reporting and proactive network monitoring for early detection and resolution of incidents.

We will answer any questions you may have through our 24/7x365 support team.

### EQUIPMENT, TEAMS AND ACHIEVEMENTS

#### Our team

- › Unified management and visibility of all connectivity solutions in one service: office, data centre, Cloud sites and remote environments.
- › Certified scenarios with Telefónica's Internet and MPLS network.
- › Extensive HW catalogue certified by Telefónica.
- › Advanced SD WAN + MPLS network functionalities.
- › Specialised support and technology teams with Fortinet certifications.
- › Portfolio integrated with security.
- › Web filtering. URL filtering.

#### Achievements

- › More than 6K sites installed on flexWAN service.

### BUSINESS MODEL

We offer a **simple and modular business model**. Monthly fee that varies depending on the number and size of sites and the chosen licence.

**No upfront investment in HW**, platforms or licenses, easy activation of licenses and security features with everything you need to be protected. Site price per month includes all elements of the service (HW, licenses, operation, and platform).

**Easy licence activation:** no on-site equipment change required. A team of experts will carry out the analysis to include the configuration of the new licence and licence changes have no impact on the service, they only change the functionalities that are available.
