DATA GOVERNANCE

Governance Assessment

HOW CAN TELEFÓNICA TECH HELP?

Telefónica Tech's Data Governance Assessment service evaluates the maturity level of your organization with respect to the different Data Governance disciplines.

The value of your organization is directly related to your ability to manage and leverage your data effectively. It is fundamental to advance in data management and become a **data-driven** company, knowing the starting point and the **gaps** you need to overcome to reach the **to-be model.**

We assess your data management maturity level with our service, identifying your strengths, possible critical points, and opportunities for improvement. This will guide you in the subsequent definition of a data governance model adapted to your needs.

WHO IS THIS SERVICE FOR?

Small companies
If you lack the necessary resources to evaluate the state of your Data Governance, our service will help you to detect improvement points quickly and in a reduced timeframe.

Medium-sized companies
For you, the Governance Assessment is a key tool to deploy effective Data Governance. This service is designed to be a springboard to help you define your to-be model.

Large enterprises
If you are a consolidated corporation, you need a robust roadmap to detect critical points in the management of your data. Our service provides you with a global view of your current situation, helping you to define your ideal governance model.

OUR VALUE PROPOSITION

Our service

We work with you as well as with the key people in your organization to obtain a complete picture of the current situation through Telefónica Tech's **Governance Assessment.** We gather the necessary information and provide you with specific recommendations and corrective actions to improve the management of your data through work sessions and tailored forms. This will strengthen your ability to make informed decisions and mitigate data-related risks.

What does it allow you to do?

Our Government Assessment service allows you to:

› **Data strategy:** Assess how your data strategies align with your business objectives.

› **Data governance:** Review organizational structures, roles, and responsibilities related to data management.

› **Data quality:** Analyze your data quality controls.

› **Security and compliance:** Evaluate your data security policies and controls, as well as regulatory compliance.

› **Architecture and technology:** Review the technology infrastructure and its ability to support data governance initiatives.

› **Culture and training:** Analyze the level of awareness and commitment of your employees regarding data governance and evaluate whether you have adequate training.

Benefits

Personalized experience

We provide you with clear and detailed communication of the assessment objectives, key roles, what will be assessed and how the process will be carried out.

Use of accelerators

We use unique accelerators and customized T-shape forms to get a complete picture of your current situation and provide you with accurate recommendations.
.

Minimum viable products

We develop minimum viable products to quickly validate and adjust solutions, with continuous technical support aligned with your objectives.
