

AI & DATA

Generative AI and Agentic AI

HOW CAN TELEFÓNICA TECH HELP?

Unlock the potential of Generative AI and AI Agents in your organization.

Telefónica Tech is your **trusted partner**, supporting you from the **adoption phase through to the production rollout of the most suitable use cases** for your business, backed by deep industry expertise and experience.

From **assessing your current situation and the maturity of AI across your business processes**, we design and implement the right solutions for both your business and day-to-day operations *whether by automating repetitive tasks or deploying AI agents to manage actions autonomously.*

WHO IS THIS SERVICE FOR?

The use of **Generative AI and Agentic AI** is suitable for organizations of any size and across any industry *such as manufacturing, healthcare, public administration, or legal services. All that is required is the **willingness to optimize and streamline processes, and a commitment to improving productivity** by integrating Generative AI and AI agents into daily operations and decision-making.*

OUR VALUE PROPOSITION

Our service

At Telefónica Tech, we guide you in discovering how Generative AI can transform your business. From virtual assistants to automated content generation (text, images, video, and audio), our solutions are tailored to your operational and strategic needs.

- We work with a wide **range of technologies and hyperscalers** (AWS, Google, Microsoft Azure) and also offer our own **proprietary platform**.
- Together with your business experts, we **identify and prioritize the Generative AI use cases with the highest value**, assessing their feasibility, impact, and integration complexity to embed them effectively into your day-to-day operations.
- **We optimize and customize generative models for your specific use cases**, leveraging leading cloud platforms to deliver efficient solutions fully aligned with your business requirements.

What does it allow you to do?

- **Task automation** to free up time and improving operational efficiency.
- **Content generation** of all kinds, from standard text responses to the creation of personalized campaigns or the production of corporate videos.
- **Tool integration**, such as virtual assistants or chatbots that enhance customer interaction by leveraging internal information search and retrieval.

Benefits

Process optimization

Thanks to Generative AI, we can improve response times and increase the efficiency of our teams' work.

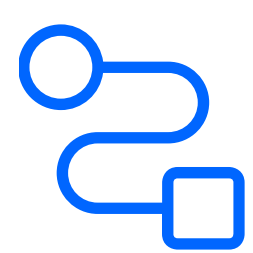

Tailored solutions

We work with you to identify the most suitable use cases and design customized deployment solutions that fit your existing systems and the specific needs of your business.

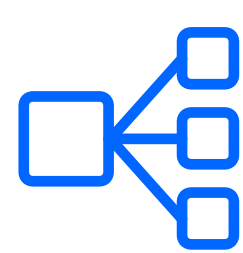

Task automation

Automate daily tasks with AI agents that make decisions on your behalf, optimizing the use of both human and technological resources.

Telefónica Tech's differential value

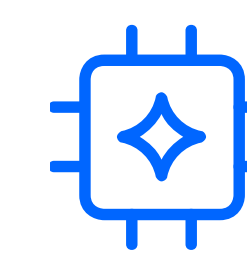

Complete and customized end-to-end solutions: we accompany you throughout the entire project cycle, from identifying the use case to implementing and optimizing models, applying Generative and Aggressive AI to automate processes or generate valuable content according to your real needs.

Multi-industry expertise: our cross-sector experience enables us to deliver customized solutions proven in real-world scenarios, always aligned with your specific needs.

Technology-agnostic approach: we work with leading hyperscalers and market platforms, ensuring we can offer the best solution regardless of the technology you choose, or through open-source development tailored to each client's requirements.

Cultural transformation support: we foster adoption through training and knowledge sharing, helping your teams learn how to leverage the full potential of these technologies according to their roles.

EQUIPMENT, TEAMS AND ACHIEVEMENTS

Our teams
