

BUSINESS MANAGEMENT (ERP)

SAP

HOW CAN TELEFÓNICA TECH HELP?

Telefónica Tech transforms your business with our customized SAP solutions. We offer SAP functional, technical and SAP Cloud platform services.

Most organizations' digital transformation processes begin by implementing a solid business process management strategy (sales, production, finance, etc.) unified on a smart platform.

In this way, companies maximize the value of their systems and change their reactive management approach to a more strategic and proactive one.

Our functional consultants help optimize financial management, supply chain, human resource management and more, as well as BASIS administration to ensure optimal operation of your SAP systems and migration projects. We

advise you in the selection and acquisition of the best SAP platforms and SAP Cloud for your business.

WHO IS THIS SERVICE FOR?

Private or public organizations that need to implement a new ERP in the cloud or migrate an existing ERP, with the continuous support of SAP and the orchestration of Telefónica Tech.

Companies that need functional or technical maintenance (SAP BASIS) of their SAP systems, as well as projects, migrations or implementation of new modules.

Organizations that want to migrate their SAP systems to the cloud and do not want to worry about maintenance or technological evolutions.

OUR VALUE PROPOSITION

Our service

Telefónica Tech specializes in offering comprehensive SAP solutions that cover both functional and technical services. Our goal is to optimize and transform our clients' business processes through the implementation and management of the latest generation SAP systems such as RISE or GROW. Our services can be complemented with our own platforms such as SAP Virtual or the SAP Cloud platform.

What does it allow you to do?

This service will allow you to:

- › Carry out the implementation and configuration of SAP modules, ensuring seamless integration with your business processes.
- › Simplify ERP migration to the cloud, thanks to the new Business Transformation as a Service package.
- › Count on analytics tools and intelligent business process technologies for decision making.
- › Adapt the system to your business needs thanks to its flexibility.
- › Predict and control costs. Control over the expenses to be incurred in each fiscal year. It is a more economical solution than its equivalent in self-provisioned mode by the client.
- › Access to resources and levels of technological specialization.

Benefits

SAP FUNCTIONAL PROJECTS

We have extensive experience in the implementation of SAP solutions, specializing in functional projects that optimize key business processes. Our team of experts ensures an efficient and customized integration, adapting to the needs of each customer to maximize performance and productivity in all operational areas.

CLOUD

Telefónica Tech has one of the broadest portfolios in the market to provide SAP services, from the SAP Cloud (RISE and Grow), the different Hyperscale (AWS, Azure, Google) and proprietary platforms such as SAPVirtual, ensuring that the solutions are adapted to the specific needs of the business and ensure its digital growth.

APPLICATION MAINTENANCE

We provide SAP functional maintenance services covering both corrective and evolutionary tasks. We take care of correcting incidents and optimizing the system, as well as implementing improvements and adaptations to ensure that the SAP solution continues to evolve according to the changing needs of your business, ensuring optimum and sustainable performance.

BASIS ADMINISTRATION

SAP BASIS projects and technical maintenance, focused on the management and optimization of the technical infrastructure. Our team is in charge of database administration, system monitoring, updates and continuous improvements, guaranteeing a secure, stable SAP environment with optimal performance. All this on the different platforms available in the market, SAP RISE, Hyperscaler or our own SAPVirtual platform.

Telefónica Tech's differential value

We offer a complete end-to-end management service, from consulting to Cloud platforms.

Extensive experience with qualified and certified personnel in SAP systems.

We are SAP Gold Partner and have a large number of qualified and certified staff with extensive experience in the sector.

EQUIPMENT, TEAMS, AND ACHIEVEMENTS

Our teams

We have more than 80 certified professionals specialized in SAP solutions and services. Our team is composed of consultants, architects and specialists responsible for providing our customers with design, migration, implementation, and maintenance services for our solutions.

Achievements

- › 40 companies in the last 10 years, with 38 operating companies.
- › Functional support to more than 25,000 users covering different processes.
- › Technical support to more than 50 customers.

BUSINESS MODEL

We offer our functional capabilities through implementation and maintenance projects, covering all phases and needs of the different business areas. On the technical side, we have the ability to manage the SAP BASIS layer on any platform, whether in systems located in our facilities, in hyperscale environments, in the SAP Cloud or in the customer's facilities.

We complement our proposal with the commercialization of Cloud platforms that best suit the needs and budgets of our customers.
