

CONTINUOUS THREAT EXPOSURE MANAGEMENT

Third-Party Risks

HOW CAN TELEFÓNICA TECH HELP?

Identify, quantify and reduce your security risks with the only security ratings solution with proven correlation to business results.

Organisations are often unaware of their own actual security performance, let alone that of their suppliers and partners. This is due to a lack of objective statistics and tools that help measure and mitigate dynamic risk across their business ecosystem.

In this sense, **Telefónica Tech has partnered with BitSight to offer the Third-Party Risks service, to help you obtain standardised visibility of the risks present throughout your ecosystem**, prioritising your investments and actions in the most critical areas that generate the greatest measurable impact over time.

WHO IS THIS SERVICE FOR?

Medium and large companies, multinationals and public sector entities that are interested in:

- **Continuously monitoring their level of Cyber Security** to maintain constant control of their risk appetite, both in your own organisation and in their supply chain.
- **Identifying cyber risks to make informed decisions** when underwriting cyber insurance policies or making a potential merger or acquisition of organisations.
- **Gaining a holistic view of Cyber Security in their country** and protecting key critical infrastructures.

OUR VALUE PROPOSITION

Our service

- Non-intrusive approach, using only external sources. No need for internal network access or complex questionnaires.
- Fully automated, scaled with your business reality.
- All organisations are measured by the same factors.
- Dynamic risk assessment, through continuous monitoring.
- Correlation, validated by independent third parties, between rating and likelihood of data leakage.

What does it allow you to do?

This service will allow you to:

- Continuously monitor and benchmark your organisation, either internally or with third parties, through Security Performance Management.
- Expose your risk within the supply chain through Third-Party Risks, helping you focus your resources on working together with your suppliers to achieve significant and measurable risk reduction.

Benefits

Security Benchmarking

Measure the impact of your security processes and tools, calculating the return on investment of your Cyber Security budget and comparing your performance against your industry and specific competitors.

Reducing risk

Reduce exposure to data leaks by making security decisions quickly and effectively.

Objective communication

Facilita conversaciones basadas en datos sobre ciberseguridad con cualquiera de los grupos de interés de tu organización.

Telefónica Tech's differential value

Telefónica Tech leverages its extensive knowledge of the customer and their environment to offer a managed service that allows, among other things, to guide the customer to improve their organisation's risk posture.

EQUIPMENT, TEAMS AND ACHIEVEMENTS

Our teams

- **+1.800** SecOps employees.
- **+1.500** security certifications.
- **+200** elite analysts in threat hunting.

Achievements

- The only security ratings solution with proven correlation to business results.

The service has two delivery models to suit your needs:

- **Self-managed:** standard service operated directly by your team.
- **Managed by Telefónica Tech:** our iSOC analysts offer you a customised service.

The service is charged as a recurring fee based on the number of entities to be monitored and the level of detail to be accessed. The customised service is quoted on a personalised basis.
