CYBER THREAT INTELLIGENCE

Threat Intelligence

HOW CAN TELEFÓNICA TECH HELP YOU?

We transform information into intelligence at different levels (tactical, operational, and strategic) to help you take a proactive approach to threats.

Knowing, understanding, and profiling our adversaries has become essential to anticipate and detect new attacks on our customers that escape traditional defensive solutions.

That's why our comprehensive cyber intelligence service provides organizations' security managers with actionable intelligence that spans all levels of cyber threat analysis.

We empower organizations to defend against even the most sophisticated cyber threats by providing a holistic view of the threat landscape, actionable intelligence, and expert guidance.

WHO IS THIS SERVICE FOR?

Organizations that have very specific intelligence requirements, but do not have the resources to form their own cyber intelligence unit.

Organizations that want to go a step further in defending their information and critical assets by adopting a proactive security posture.

Organizations interested in increasing their visibility to emerging threats and being able to respond faster and more effectively.

OUR VALUE PROPOSITION

Our service

The value of our service lies in our transformation of information into intelligence at different levels to answer how, where, who and why cyber criminals operate. All of this, tailored to the profile of each consumer.

This intelligence, shared with the various security teams established within the organization, has the potential to help identify, communicate, and reduce risk across the organization.

What does it allow you to do?

The service offers different products according to the type of intelligence, allowing for:

› **Tactical intelligence:** ensure preparation and implementation of security controls and processes.

› **Operational intelligence:** understanding and adapting to evolving attack patterns.

› **Strategic intelligence:** make informed decisions about your long-term cyber security posture.

Benefits

Informed decisions

It helps stakeholders to invest wisely, mitigate risk, be more efficient and make faster decisions.

Detection

It proactively prepares and protects your business, with visibility of trends, actors, and their motivations and TTPs.

Prevention

It allows to increase the number of preventive blocks and the number and the impact of patched vulnerabilities.

Response

It reduces the mean time to detection (MTTD), facilitating the discovery of a greater number of incidents, and the mean time to remediation (MTTR).

Telefónica Tech's differential value

We, as MSSP, are generators of our own threat intelligence, which we combine with a wide variety of sources from our ecosystem of partners and strategic alliances.

Our team of cyber intelligence experts has in-depth knowledge and experience in identifying, analyzing, and mitigating threats and incidents.

We adapt our services to meet the needs and risk profiles of each customer, offering a customized approach.

EQUIPMENT, TEAMS, AND ACHIEVEMENTS

Our teams

› **Multidisciplinary team that provides services worldwide** from the Digital Operations Centers (DOC), located in Madrid and Colombia.

› **+20M** indicators of compromise in our intelligence platform.

› **4k annual ransomware incidents identified** by our team and recorded in our intelligence platform, along with adversary and TTPS information.

Achievements

› Recognised as a major contributor to the Spanish National Network of SOCs.

› Member of the Cyber Threat Alliance, created by the main players in the cyber security world with the aim of sharing intelligence on emerging threats.

BUSINESS MODEL

Threat Intelligence is a turnkey service with a recurring subscription fee based on a number of options to be selected per customer.

No complex provisioning or deployment required.
