IDENTITY & DATA PROTECTION

Digital Certificates

HOW CAN TELEFÓNICA TECH HELP?

We guarantee the security of your website by issuing TLS/SSL certificates through our own platform

The web is undoubtedly one of the most important digital assets of your organisation and must transmit security and trust to your customers in every transaction. Beyond what the market and laws impose, **it is essential to guarantee a TLS/SSL security layer in those websites where clearly sensitive information is accessed.**

Certificates are necessary for logging in and accessing financial information, personal data, legal documents, etc. In e-commerce, a website with a digital certificate, issued by a reputable certificate authority and boasting about it, will have a better chance of success in every transaction initiated.

The main search engines penalise websites that do not have trust certificates installed. **At Telefónica Tech we guarantee the security of your website by issuing TLS/ SSL Digital Certificates through our own platform, carrying out exhaustive monitoring of our customers and controlling the entire life cycle of the certificates.**

WHO IS THIS SERVICE FOR?

Medium and large companies owning websites where transactions are carried out or where any personal and sensitive data requiring security and protection is requested.

Organisations in the cloud have and must display a digital SSL certificate that proves trust and security. From a simple certificate to powerful tools for discovery, management, and control of the entire lifecycle of the digital certificate inventory.

OUR VALUE PROPOSITION

Our service

Telefónica Tech manages DigiCert's SSL and MPKI certification services for the most important IBEX35 companies, including the main national and international banks present in Spain for the issuance of SSL secure server digital certificates, users and document signatures.

We offer different types of certificates: SSL (single domain, multi-domain, wildcard, EV, client, private CA), code signing, document signing, etc.

What does it allow you to do?

This service will allow you to:

› **Display your website secure and reliable** in all browsers.

› **Protect sensitive information.**

› **Ensure GDPR compliance.**

› **Have all the guarantees of Telefónica,** DigiCert Platinum Partner.

Benefits

Agility in issuance times

We manage the issuance of certificates through our own CertCentral® platform in the manufacturer's PKI structure, which allows us to guarantee faster issuance times.

Cost reduction

We provide specific offers with volume discounts and special offers thanks to strategic agreements.

Personalised attention

We have a highly qualified technical and commercial team that offers our clients personalised attention and real knowledge of the casuistry of the national market.

Trust and security guaranteed

We manage the issuance of certificates with a prestigious certification authority, providing the necessary confidence to ensure the identity of the client holding the certificate.

Telefónica Tech's differential value

We have our own customer service centre, open during Spanish hours, with first and second level commercial attention and technical support.

We issue certificates on our own management platform, which allows us to be more agile and to track orders and control the entire lifecycle of the certificates.

We are a DigiCert Platinum Partner for the EMEA region (Europe, the Middle East and Africa). We protect your data with a prestigious certification authority and offer you the advantages of our strategic agreement.
