

## NETWORK SECURITY

# Secure your home network

### HOW CAN TELEFÓNICA TECH HELP?

## Protect your digital life and your family's

**Secure your home network** protects in real time your Internet browsing from potential threats such as malware and fraud (identity theft known as phishing). All you need to do is activate it and with no need to install anything on your devices, you will be protected by your Movistar network (3G/4G/5G network and home Wi-Fi network).

Its activation is immediate and independent of the operating system, as well as the device you are using to browse. Once the activation of the service has been requested, you will receive a welcome SMS to Secure your home network. From that moment on, the protection of your Movistar network browsing will be immediate. This solution checks the reputation of the domain you want to access and if it is of dubious reputation, it alerts you and blocks access, allowing you to continue at your own risk.

### WHO IS THIS SERVICE FOR?

For all Movistar residential customers, offering them protection to their home network in a simple way, with no need to install software on their devices or make any configuration on their router.

## OUR VALUE PROPOSITION

### Our service

#### No installation

Our solution integrates directly into the network, eliminating the need to download and install additional software on devices.

#### Immediate protection

Effectively blocks any malware or phishing attack attempts while browsing the Internet in real time.

#### Security and peace of mind

Alerts you to potentially dangerous websites, without requiring your intervention. This constant vigilance means users can browse with confidence, knowing they are protected against hidden risks on the web.

#### Peace of mind for the whole family

270 million threats filtered out last year alone. Provides a secure digital environment for all family members, regardless of who is connected to the Internet.

### Benefits

#### Easy to activate

Protect your home network in a simple way, with no need to install software on your devices or configure your router.

#### Total and constant protection

Its main function is to block suspicious links that might contain malware or participate in phishing scams. In this way we can browse safely and securely.

#### Blocking SMS scams

Thanks to Secure your home network you can instantly block scams such as phishing when entering links received by SMS.

## BUSINESS MODEL

It is a **service included in the Movistar fiber rates**, available to all customers, just activate it through movistar.es, 1004, or Movistar stores or even from the Smart Wifi app.

## Telefónica Tech's differential value

Telefónica Tech's team has designed and developed this service using the capabilities of Telefónica's global platforms. It also combines the use of its own Cyber Security intelligence sources together with sources from leading providers in the market to deliver a differential service.

### EQUIPMENT, TEAMS AND ACHIEVEMENTS

## Achievements

- **1,22MM** customers
- **Over 270 million threats** detected by 2020.
