

NETWORK SECURITY

Your Small and Secure Business

HOW CAN TELEFÓNICA TECH HELP?

Cyber Security for Small and Medium Businesses

Most SMEs lack adequate security measures to respond to a cyberattack and are therefore the main targets. Poor security management can not only have an economic impact on the company, even paralyzing the business, but can also affect the reputation and trust of partners and customers, for example through possible leaks of sensitive data.

WHO IS THIS SERVICE FOR?

Small and medium-sized organizations that require a modern and effective cyber security capability but **lack adequate security measures to respond to a cyberattack and do not have the specialized personnel to implement and operate them on a daily basis.**

OUR VALUE PROPOSITION

Our service

Your Small and Secure Business provides a complete service, from the first steps to protect the SME company to the maintenance of security systems. Your Small and Secure Business provides you with support and resolution of your doubts and incidents through our personalized support center (SOC), a group of experts who speak your language and make Cyber Security simple.

What does it allow you to do?

This service will allow you to:

- Reduce Risk: it's about staying ahead of those who intend to attack your business.
- React faster: maintain the continuity of your business with a minimum service that avoids the interruption of your activity.
- Save costs: avoid penalties, emergency recoveries, indemnities...

Benefits

Simple

The most professional security without the need for initial investment or specific knowledge including specialized support and easy configuration.

Effective

All our solutions are based on technologies from the best managed security service providers and an extensive 24/7 expert support team.

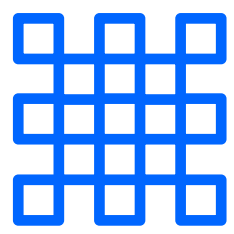

Trusted

Solutions that prevent attacks and minimize the impact that vulnerabilities and risks can cause to your company.

BUSINESS MODEL

It is a **complete turnkey service**, i.e. an annual subscription that has everything you need to protect an SME. Choose between 3 levels of protection, depending on your company's needs in terms of data, email usage or browsing. No investment in hardware or software: a monthly fee and forget about it.

Telefónica Tech's differential value

Collective Intelligence. Our service aggregates information regarding attack patterns from more than 1.200 customers worldwide, as well as from the TELCO Security Alliance. These patterns allow us to automatically detect suspicious activity within your organization.

Managed by Experts. We have a Security Operations Center (SOC) of Telefónica Tech, formed by highly qualified and recognized experts in the Cyber Security sector that will be dedicated to a specialized and efficient management of this service.

Unified Access. Access the Management Area of Your Small and Secure Business and you will be able to consult all the information of your service, as well as open communication with our experts of the Security Operations Center (SOC).

EQUIPMENT, TEAMS AND ACHIEVEMENTS
