

SECURE MICROSOFT

Secure Microsoft 365

HOW CAN TELEFÓNICA TECH HELP?

Secure your Microsoft environment with our consulting, implementation, and security management services using the Microsoft tools available to you

Having a secure and protected work environment has become a must-have component for any organization, especially in recent years, as digitalization has increased the risk of threats and, therefore, the vulnerability of our remote productivity and collaboration environments.

Telefónica Tech's Secure Microsoft 365 offers **a complete solution of high-level security services to strengthen your organization's Microsoft 365 environments** to help you build a secure environment.

Thanks to this solution, we provide you with different security tools that allow you to implement **the Zero Trust paradigm** and address security in all areas in a flexible and customized way. We have the possibility to build a high-level protection shield with these tools, addressing security in four modules: Identity, Devices, Information, and Threats. We continuously improve security and optimize your economy with the support of an expert and multidisciplinary team to be addressed in a flexible and customised way.

WHO IS THIS SERVICE FOR?

Large and medium-sized companies amid digitalisation that want to add a layer of security to their main business vectors.

Organisations that want to take full advantage of the security potential already available through Enterprise licensing of Microsoft 365.

Organisations that want to understand the security status of their Microsoft SaaS environment and improve their posture generally or in a specific domain within: Identity, Devices, Information and Threats.

OUR VALUE PROPOSITION

Our service

Telefónica Tech provides a customised solution based on the current state of your company. We implement the necessary tools, configure the relevant policies, and thus achieve the highest possible level of security.

We carry out a diagnosis with the consultancy services and establish personalised goals, adapted to the priorities of your organisation. We put in place the appropriate tools with the implementation services according to a roadmap aligned with your concerns and pain points. We finally carry out a management that allows a continuous improvement of security.

What does it allow you to do?

This service will allow you to:

- › **Overview the security status** of the environment of Microsoft 365.
- › **Manage and protect identity**, devices, and information.
- › **Monitor and respond to threats** in your environment.

Benefits

Applied security

You have the tools; we provide the services to ensure that your security is at the optimum level for your organisation.

Cost reduction

Know in advance the cost of the service and how far you can go.

Certified specialists

Microsoft-certified specialists knowledgeable in multiple security technologies at your disposal.

Flexibility
