

Business applications (SaaS)

Microsoft 365

HOW CAN TELEFÓNICA TECH HELP?

Telefónica Tech helps you transform the way you work with Microsoft 365 cloud productivity tools flexible RISE with SAP

Digital acceleration and the hybrid working model are phenomena that are driving change and ensuring business evolution. The main challenge for leaders today **is to guarantee that this new approach works, is sustained over time and ensures the well-being of employees** in their workplaces.

Telefónica Tech offers you a benchmark solution approach to productivity and efficiency to meet the challenges of digitalisation. **We combine the best of both**

worlds to meet the expectations of your employees and the development of your company, thanks to the support of Microsoft 365.

We provide and support you in implementing all the applications you need **to keep your organisation connected, share information and work as a team from anywhere:** we offer you useful tools such as Word, Excel, PowerPoint, Outlook; cloud storage with OneDrive; and remote collaboration with Microsoft Teams.

HOW CAN TELEFÓNICA TECH HELP?

Large organisations seeking to advance the digitalisation of their employees' workplaces, providing them with all the cloud-based tools they need to work collaboratively and securely from anywhere.

Small and medium-sized companies that want to have the same tools that large corporations work with but pay only for the number of licences they really need.

Companies in need of technological transformation in their current systems and agile development teams, who need immediate resources in a flexible, efficient, and secure way.

OUR VALUE PROPOSITION

Our service

Telefónica Tech accelerates the digitalisation and productivity of your business by offering you the secure and customised integration of Microsoft Office 365 in your communication and collaboration processes in the cloud. Having all services with a single provider simplifies processes and means working with a team that knows your business and all your connectivity, communication and data protection needs.

We have Microsoft Gold Partner training in multiple competencies to offer support in the configuration of the service and resolution of any incident.

What does it allow you to do?

This service will allow you to:

- › **Streamline internal processes** between employees **by having more efficient tools to work with.**
- › **Have the best applications in the cloud to work from anywhere** with an internet connection.
- › **Ensure fluid communication and facilitate the dissemination of information** between members of the company.
- › **Provide the system with a layer of protection for all communications** within the company.

Benefits

Increased productivity

Microsoft 365 applications facilitate team building and information sharing in the cloud and are automatically updated, significantly reducing maintenance times.

Flexible business model

We offer the possibility of contracting or eliminating licences at any time or getting better prices in exchange for a longer permanence in the service.

Adaptation to remote working

We help you make it possible for your employees to work from anywhere, with the only requirement being internet connectivity. Employees can share documents and hold meetings wherever they are.

Attention 24x7x365

We are able to resolve any incident and support you in the service configuration process. We take on all the necessary tasks so that companies can worry about the priority tasks of the business.

Telefónica Tech's differential value

We guarantee **a complete and comprehensive remote working solution** with the support of highly qualified professionals thanks to our skills and experience.

We offer **a comprehensive productivity, communication, and collaboration solution** to suit the customer's needs.

We simplify all activities related to service management and always guarantee **the protection of company and customer data**.
