

# RFID for Retail

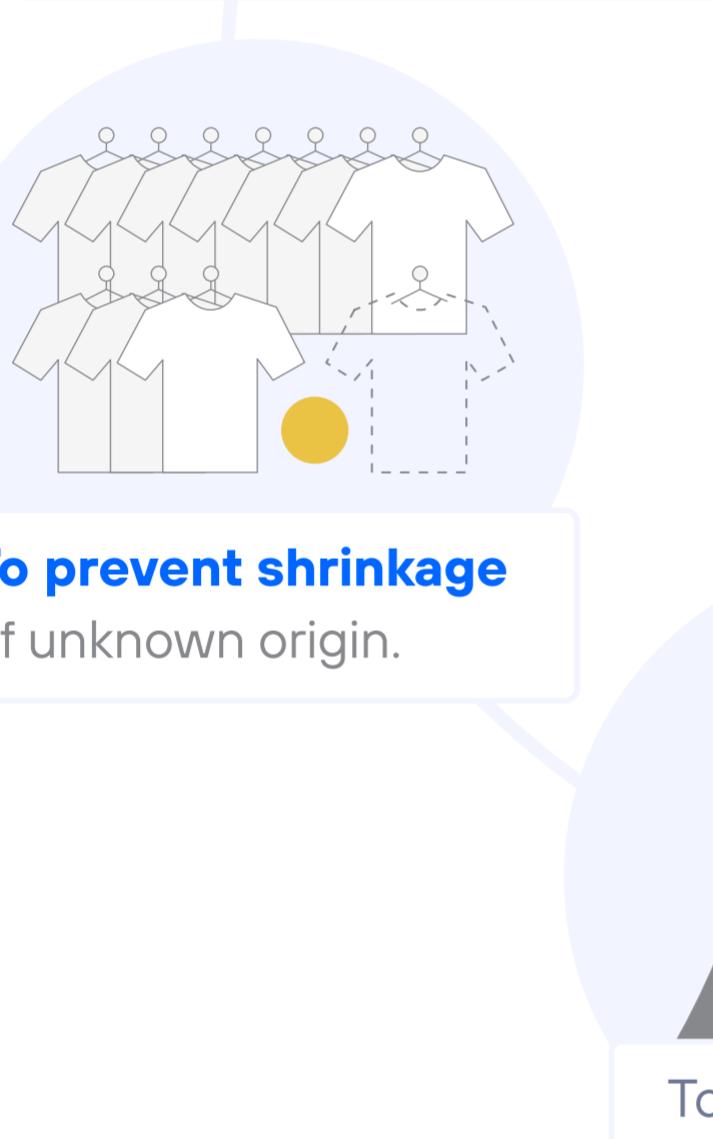

A solution that allows **real-time control**, via **RFID tags and antennas**, of the **complete traceability of products** on your journey from the factory to the shop, while, at the same time, facilitating the **improvement of the customer experience at the point of sale**.

## A solution to meet your challenges

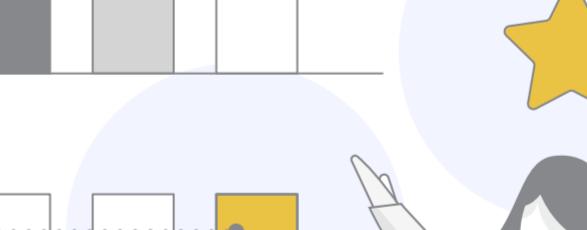

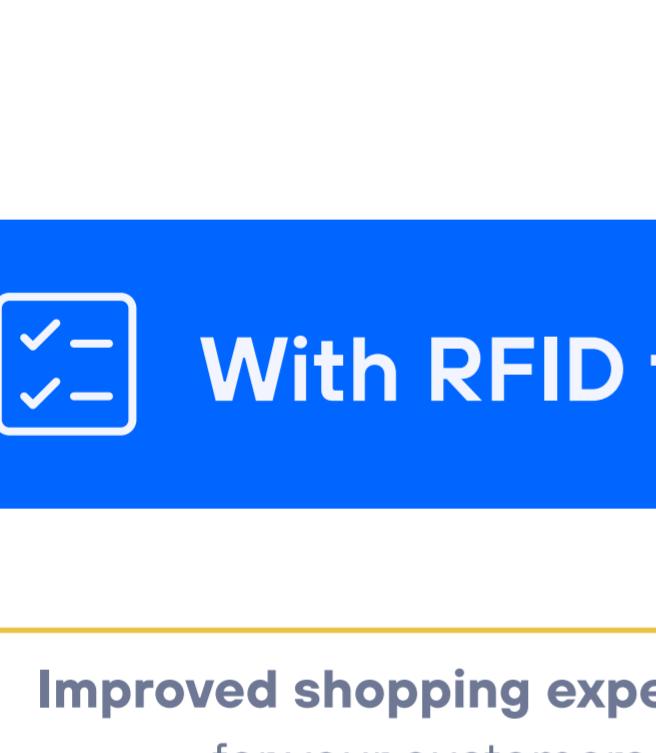

- › **Controls the traceability of the product** throughout the entire logistics chain.
- › **Reduces unknown shrinkage**.
- › **Performs restocking strategies and trends** based on real-time data.
- › **Improves the experience in your shop**.
- › **Efficiently manages** inventory, replacement and check out processes.

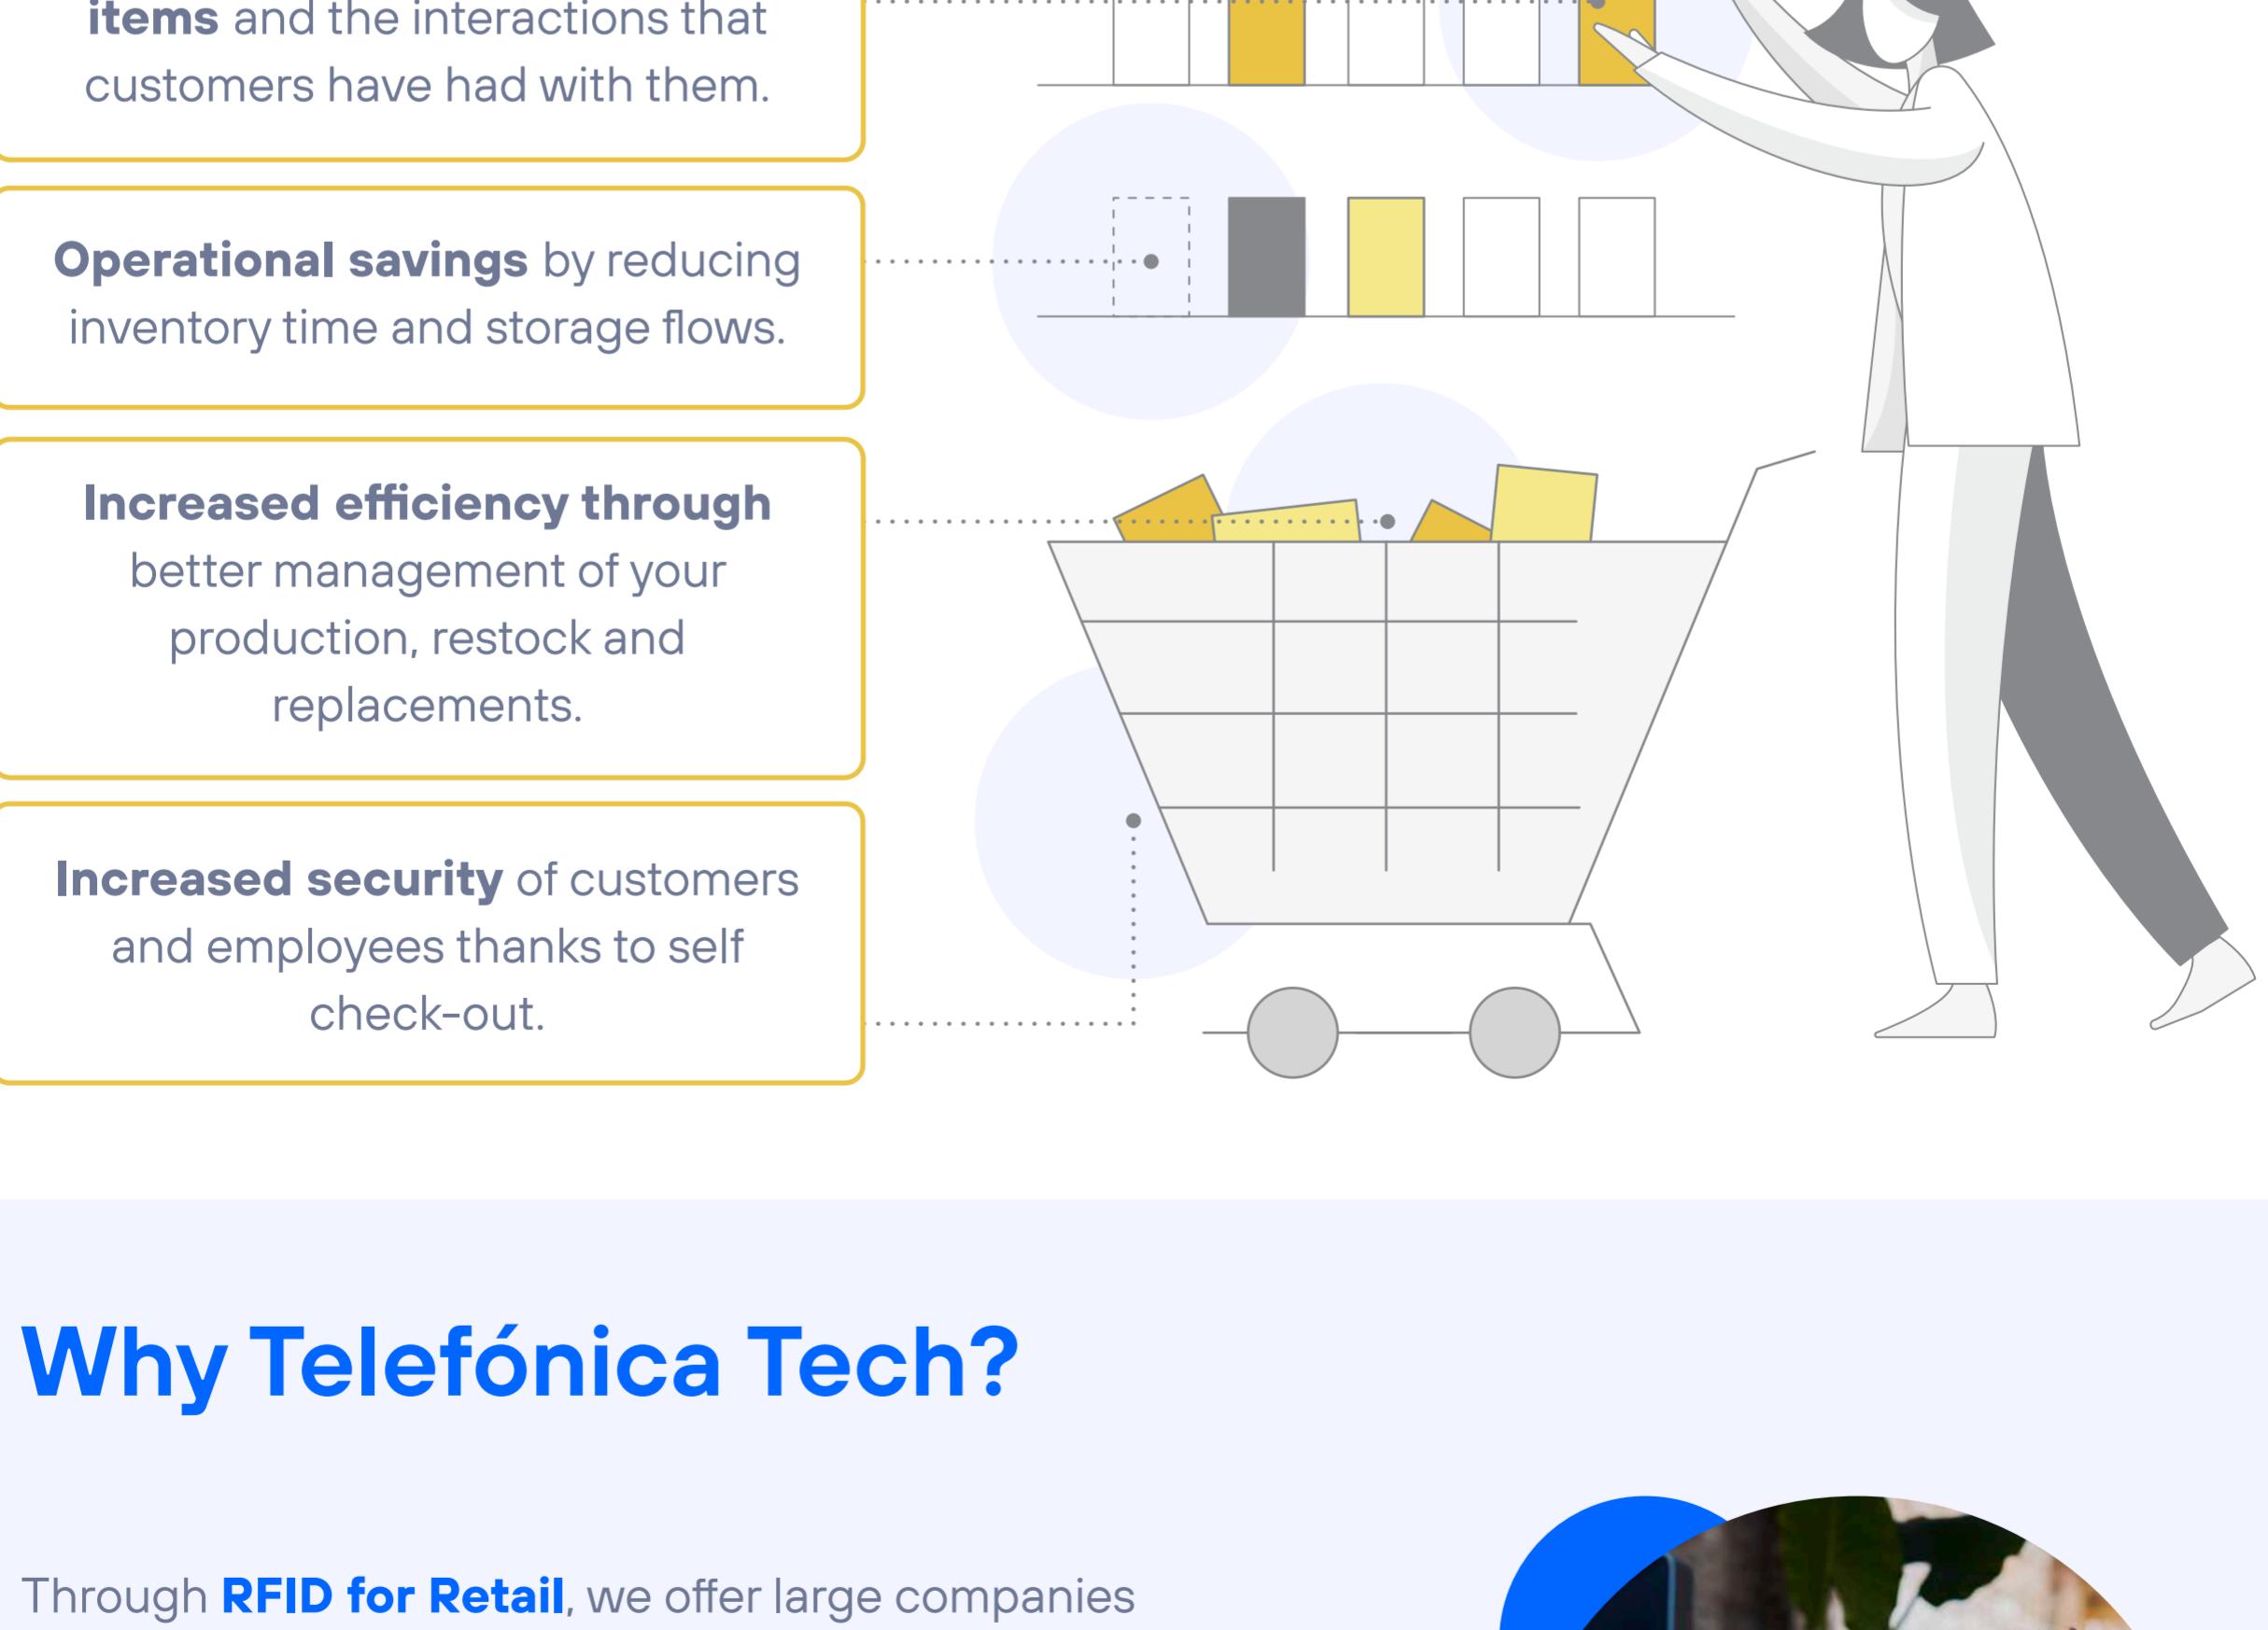

## RFID for Retail allows...

- **To take inventory** of products.
- **To alarm and disarm** products.
- **To enable screens to provide product** information.
- **To replace** more efficiently.

## RFID

Through **RFID for Retail**, we offer large companies and multinationals in the Retail sector the **optimal way to digitally transform themselves**.

Find out how **RFID for Retail** can help you **manage your products and commercial spaces more efficiently**.
